COLLABORATION | INTRICACY | STRATEGY

Think you know how many legs a millipede really has? Or what percentage of the Earth's surface is actually covered by water? ESS Production, in collaboration with M.I.G, has developed a special conference-game edition of the hit game 0-100.

Here, you'll compete in teams on large boards, allowing everyone to get involved and engage together. You'll puzzle, guess, and laugh at the most unexpected questions—where the answer is always a number between 0 and 100.

It's the perfect activity for a mid-conference break or as a fun event during the pre-dinner drinks. Whenever you play, it will be a moment filled with laughter, team spirit, and smart (or not-so-smart) guesses.

Will your finance manager truly shine when it comes to the numbers—or will the one who always "goes with their gut" take home the victory?

You Go - Wellness Boost

HEALTH | MOTIVATION | MOVEMENT

Give your employees an energy-filled break that strengthens both the individual and the organization. We begin with an inspiring lecture on motivation, joy, and how small steps can lead to big results. Participants will take away concrete tools for building mental energy and sustainable everyday habits. Next, we move on to a health assessment where each person creates their own health wheel – an exercise that highlights strengths and areas for development. At the same time, HR and management gain an overview that provides valuable insights into the organization's overall well-being. We wrap up with light movement and togetherness, where everyone can join in and recharge their energy. The result is greater workplace joy and a sustainable investment in both physical and mental health.
